

TachoDrive2 device for downloading the data from digital tachographs and driver cards

MATT
automotive

TachoDrive2 is a device designed for downloading the data in the DIGITAL TACHOGRAPH SYSTEM. Together with the included software, it allows to comply the legal requirements concerning the downloading and storing the data from the SYSTEM. It can download the data directly from the driver card (built-in slot) as well as from the tachograph mass memory (cable included).

Main features:

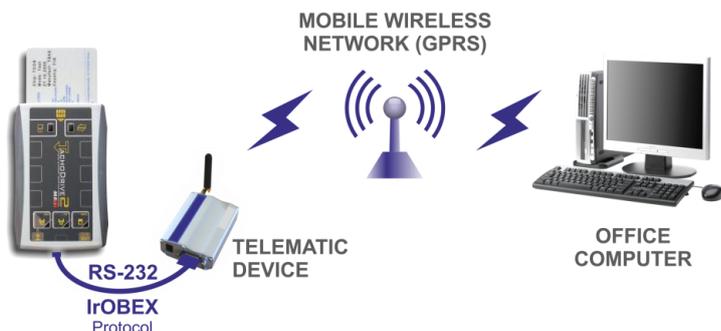

- **Compatible with all approved digital tachographs**
- **Built-in driver's card reader with landing contacts** - reading the whole card takes less than 60 seconds, connector with contacts which land on the card rather than slide over it to minimize card wear
- **Free software available** – TACHOMATT Yellow Light software can be downloaded from www.tachomatt.com
- **Device activity status acoustic and flash signalization**
- **Ergonomic casing, small dimensions**
- **USB Port** does not require any drivers to work with the PC

Technical data:

power:	2 x AA accumulator NiMh, tachograph port, USB port of the PC
power consumption:	max 65 mA
dimensions:	110,3x69,4x27,7 (LxWxH)
weight:	150g (incl. batteries)
operating temp.:	-5 ... +55 °C
storage temp.:	-25 ... +70 °C
protection degree:	IP-40
ports:	smart card slot, USB slave (cable B),
PC system requirements:	WIN 7, Vista, XP, Pentium III 800 Mhz, 256 MB RAM, USB, TACHOMATT Yellow or other software for drivers activity analysis

TD2 RS version

The data from driver card and tachograph mass memory can be transferred to a telematic device via the RS-232 port with independent IrOBEX protocol standard.

TD2 Terminal Box

Solid, metal box with a key-lock to fix on the wall in the drivers room, in the company. Includes clamp and mounting screws.
